---

**Background and Purpose:** The goals of the NYC Department of Health and Mental Hygiene (DOHMH) through its Bureau of HIV/AIDS Prevention and Control, consistent with the goals of the National HIV Strategy and the Centers for Disease Control and Prevention’s High Impact Prevention Approach, are aimed at reducing HIV-related illness and death. Specifically, the DOHMH’s goals are to: reduce new HIV infections; decrease sexual and drug-using behaviors that increase the potential for HIV infection; optimize health outcomes; and reduce HIV-related health disparities. This RFP was developed in an effort to achieve these goals by identifying providers to contribute efforts to prevent HIV infections and improve treatment and care for people already infected among individuals living in NYC’s five boroughs.

The contractors awarded for each category of this RFP, as listed above, are tasked with delivering a stream of services, and contributing to NYC’s implementation of High-Impact Prevention in high priority populations serviced in several key ways.
